UN BANDO EUROPEO PER LA MOBILITA' SOSTENIBILE: 15 MILA EURO PER SOLUZIONI E IDEE DI STARTUP INNOVATI

Devi disattivare ad-block per riprodurre il video. Play Replay Play Replay Pausa Disattiva audio Disattiva audio Disattiva audio Attiva audio Indietro di 10 secondi Avanti di 10 secondi Spot Attiva schermo intero Disattiva schermo intero Skip Attendi solo un istante , dopo che avrai attivato javascript Forse potrebbe interessarti , dopo che avrai attivato javascript Devi attivare javascript per riprodurre il video. A raccolta le startup innovative impegnate nel settore della mobilità urbana: fino al 31 maggio è possibile partecipare al bando europeo per la "Business Acceleration" di KIC Urban Mobility. Per le startup selezionate è previsto un finanziamento di 15mila euro, un piano gratuito di sei mesi di "business acceleration" con servizi di tutoraggio e coaching, la validazione delle tecnologie, una ricerca di mercato, contatti con investitori, uno stage di sei mesi in una sede selezionata, oltre ad un accesso diretto ai "living labs" per la creazione di nuovi prodotti e servizi. L'iniziativa nasce nell'ambito del programma europeo EIT Urban Mobility e si propone di promuovere lo sviluppo di soluzioni avanzate per ridurre il traffico veicolare, migliorare l'efficienza dei sistemi di trasporto e rendere il pendolarismo più sostenibile e veloce, con l'obiettivo di accelerare la transizione verso forme di trasporto a basse o a zero emissioni. L'EIT Urban Mobility è un consorzio di 48 partner provenienti da 15 Paesi costituito con l'obiettivo di favorire il benessere dei cittadini e l'inclusione sociale negli spazi urbani ripensando il sistema dei trasporti in chiave ecologica e smart, anche alla luce degli obiettivi fissati dalle singole municipalità. Dei 48 partner (13 città, 17 aziende di automotive e ICT, e 18 tra università e centri di ricerca) solo due sono italiani: ENEA e la **Fondazione Politecnico di Milano**. Il progetto, che si concluderà nel 2026, ha una dote finanziaria di 1,6 miliardi di euro. Devi disattivare ad-block per riprodurre il video. STARTUP, AL VIA BANDO UE PER SOLUZIONI DI MOBILITA' URBANA SOSTENIBILE

Previsto un finanziamento di 15mila euro e un piano gratuito di sei mesi di "business acceleration" Aperte fino al prossimo 31 maggio le candidature al bando europeo per la "Business Acceleration" di KIC Urban Mobility. Rivolta alle startup innovative impegnate nel settore della mobilità urbana, l'iniziativa prevede un finanziamento di 15mila euro, un piano gratuito di sei mesi di "business acceleration" con servizi di tutoraggio e coaching, la validazione delle tecnologie, una ricerca di mercato, contatti con investitori, uno stage di sei mesi in una sede selezionata, oltre ad un accesso diretto ai "living labs" per la creazione di nuovi prodotti e servizi. Il bando, nato nell'ambito del programma europeo EIT Urban Mobility in partnership con l'Enea, si propone di promuovere lo sviluppo di soluzioni avanzate per ridurre il traffico veicolare, migliorare l'efficienza dei sistemi di trasporto e rendere il pendolarismo più sostenibile e veloce, con l'obiettivo di accelerare la transizione verso forme di trasporto a basse o a zero emissioni. L' EIT Urban Mobility – spiega l'Enea in una nota – è un consorzio di 48 partner provenienti da 15 Paesi costituito con l'obiettivo di favorire il benessere dei cittadini e l'inclusione sociale negli spazi urbani ripensando il sistema dei trasporti in chiave ecologica e smart, anche alla luce degli obiettivi fissati dalle singole municipalità. Dei 48 partner (13 città, 17 aziende di automotive e ICT, e 18 tra università e centri di ricerca) solo due sono italiani, Enea e la **Fondazione Politecnico di Milano**. Il progetto, che si concluderà nel 2026, ha una dote finanziaria di 1,6 miliardi di euro.
